

Position: **Machine Operator**
Location: **Mississauga, Ontario**

Reports to: Supervisor
Employment Type: Full Time
Category: Operations
Industry: Commercial and Institutional HVAC

Company Overview:

Temspec Inc. is an original equipment manufacturer (OEM) of heating and cooling equipment for the North American school and high-rise condominium / hotel markets. We are a family owned business who prides itself on the quality of our products, our diverse company culture, and friendly, family-oriented atmosphere.

We believe in making Living and Learning Better by providing Quiet, Efficient HVAC products that work Perfectly in the spaces our Customers Create – Quickly and Without Surprises.

Working under the direction of the Supervisor, the Machine Operator will play an integral role increasing operational efficiency, company profitability and customer satisfaction by accurately and safely operating the brake press, testing machines, pipe expander, the copper chop saw or any other critical mechanical equipment in the plant. He/She will maintain efficiency by following work orders and ensuring that required material is prepared or tested according to production schedules.

Primary Roles & Responsibilities:

- Read drawings, schematics, diagrams and work orders in order to determine job requirements to meet production schedules
- Set up brake press, testing machine, pipe expander or copper chop saw to meet customer requirements
- Cut, bend or test material and subassemblies according to work orders
- Ensure quality of performed work and compliance with the requirements
- Issue accurate and timely reports as required
- Works in accordance with Health and Safety regulations, Company rules, policies and procedures
- Maintain a clean, organized and safe work area
- Perform other duties as assigned

Qualifications:

- 2-3 years of experience setting up and using a manual brake press and other manual machines in a manufacturing environment
- Ability to read blue prints and work orders
- Ability to use a tape measure and other hand tools to measure and cut material according to specifications
- Ability to identify and change machine setup accordingly
- Excellent problem solving and time management skills with a hands-on approach to problem resolution
- Excellent interpersonal skills with strong written and verbal communication skills
- Ability to work independently with minimal supervision
- Capable of lifting up to 50 lbs
- Ability to stand for extended periods
- Team player with a positive “Can Do” attitude
- Working knowledge of safe work practices
